TRANSFORuM – Roadmap on a European Information, Management and Payment System

Florian Kressler

Florence, 9th March, 2015

3rd Florence Intermodal Forum

TRANSFORuM

- FP-7, 2-year project – 2/2013 – 1/2015
- 4 Roadmaps for goals in the White Paper on Transport 2011
- Strong stakeholder involvement!

TRANSFORUM – White Paper Goals

- Halving clean urban transport and CO₂-free city logistics by 2050
- Achieving a shift of road freight transport to rail and waterborne modes by 2050
- Complete and maintain the European high-speed rail network by 2050
- Establish a framework for a European multimodal transport information, management and payment (MIMP) system until 2020

Main conclusions from MIMP roadmap

- Lacking vision and common understanding on how an integrated European Multimodal, Information, Management and Payment system should look like
- Many institutional issues involved – more than technical issues
- Missing business case for providing and sharing data

Other issues

- Standardisation – data formats and data exchange
 - Can standardisation hamper innovation?

- Role of public and private sector
 - Public sector taking leading role?

- Quality control
 - Who is responsible?

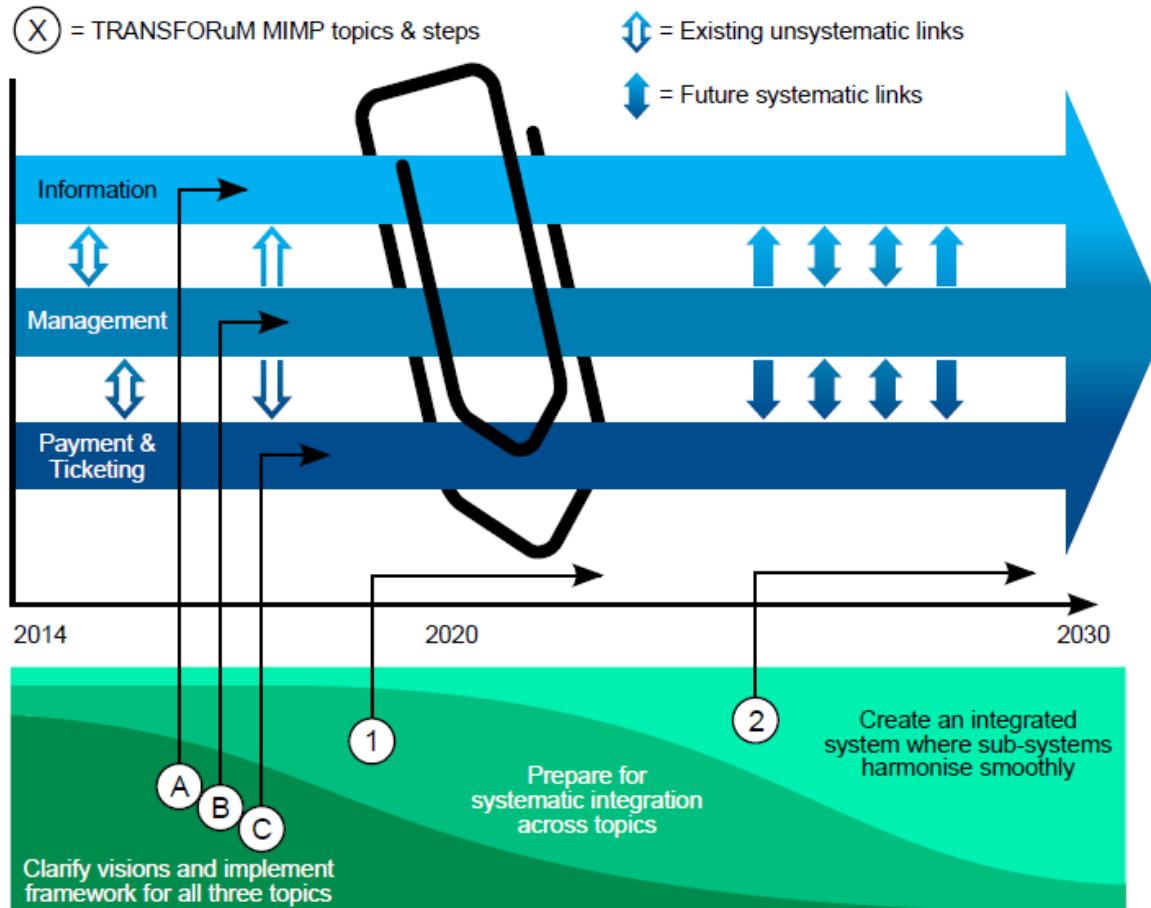

Other issues

- Cross border data exchange
 - Some efforts underway

- Real-time data
 - Data collection and distribution

- Ensuring accessibility to information
 - Removing/preventing barriers

Moving towards the White Paper MIMP goal

- For more information on the TRANSFORuM project please visit
