A European Green Deal
Striving to be the first climate-neutral continent

Important Flagships for ATM transformation

Ref: 4D and Space Communication

An optimised network to accommodate future demands

2.48 %

G2G operational measures to reduce fuel consumption

4.32 %

Aircraft operators to enhance their procedures

2.14 %

8.94%

How to achieve this ATM transformation?

- All stakeholders need to focus on the same objective: reducing fuel consumption and associated emissions.
- Accelerating the deployment of ATM solutions
- Sharing additional key data such as fuel...
- Building resilience / reducing impact of climate change on our operations
