Introduction

The Florence School of Regulation and the Loyola de Palacio Chair are organizing this Autumn School for Researchers in consortium with the Fraunhofer Cluster of Excellence “Integrated Energy Systems” and Turin Polytechnic University.

LARS is a residential training addressing researchers with modeling skills who are keen to support the energy policy and regulatory debate.

During the three days in Florence, academic presentations will be followed by testimonials from the policy world and industrial representatives and journal editors in the field of energy economics and engineering will share insights on how to create a presence in academia with relevant publications.

Participants will also apply what they have learned in the course by exchanging feedback on the research papers submitted by other participants, with additional coaching from the instructors in the course.
