

Effectiveness of the Airport Slot system from a network perspective

Florence Air Forum: Budapest Edition

Matthis BIRENHEIDE

Head of Unit – NM Airports

06/09/2019

Agenda

1

- **Background**

2

- **Airport Slots and Network Management**

3

- **New Concepts**

1

- **Background**

History

- Airport Slot Regulation 1993
 - Some amendments up to 2004
 - More commercial than operational (ATM)
 - Several formulations not clear
- SES Regulations 2004
- ATFM Regulation 2010
- NM functions 2011
- Airport Slot regulation not aligned with SES intention

2

- **Airport Slots and Network Management**

Experience ATM and Airport Slots 1/2

- Very good collaboration with EUACA and IATA
- Airport Slot information used by NM to enrich traffic predictions
- Issues:
 - Airport Slots - IATA language
 - ATM/ATFM - ICAO language
 - Flight Plans do not contain airport slot information
 - Business element not considered in flight planning
 - Ad-hoc slots missing in the traffic picture

Experience ATM and Airport Slots 2/2

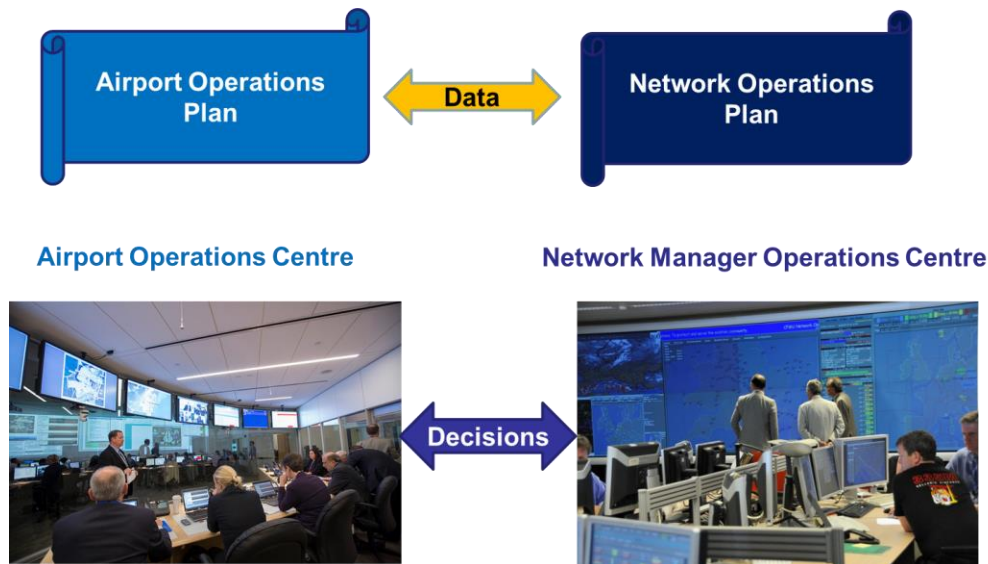

- Post-operational assessment by Coordinators overall very good
- Impact on the day of operations not prevented with current system
- Local rules differ
- General/Business (GA/BA) Aviation with ad-hoc slots remain an issue
- GA/BA is a growing market
- Mechanism on when an airport becomes schedules facilitated or coordinated can be improved

3

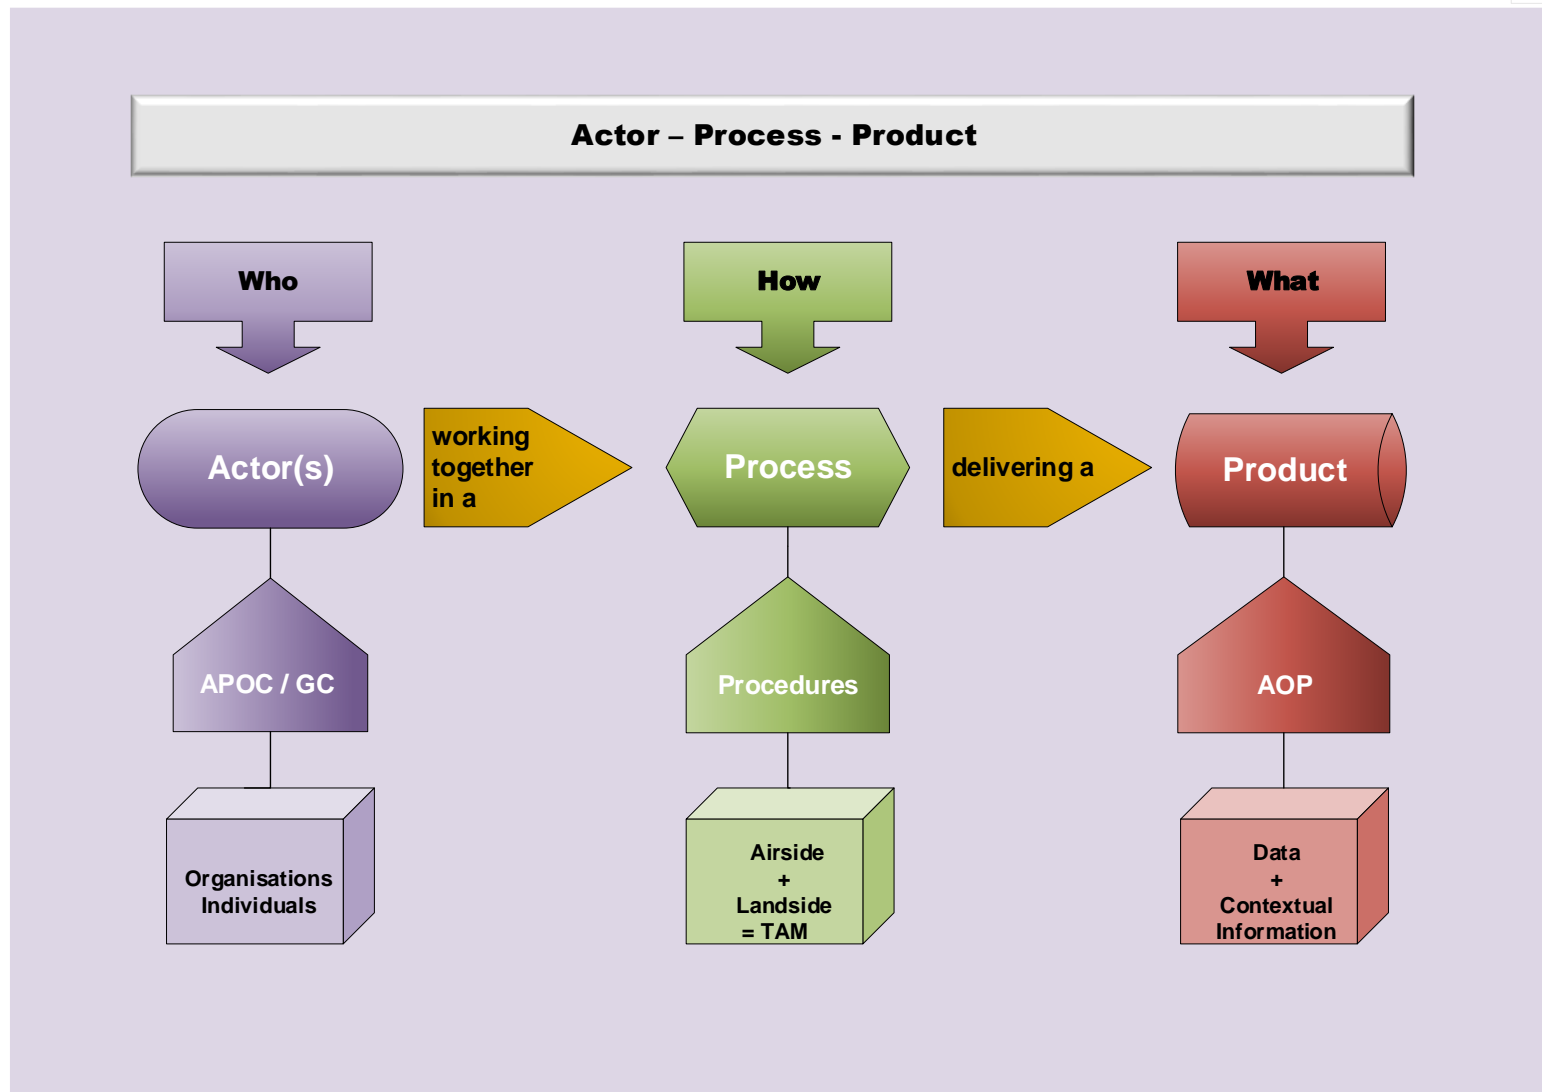

- **New Concepts**

Airports as integral part of the ATM Network

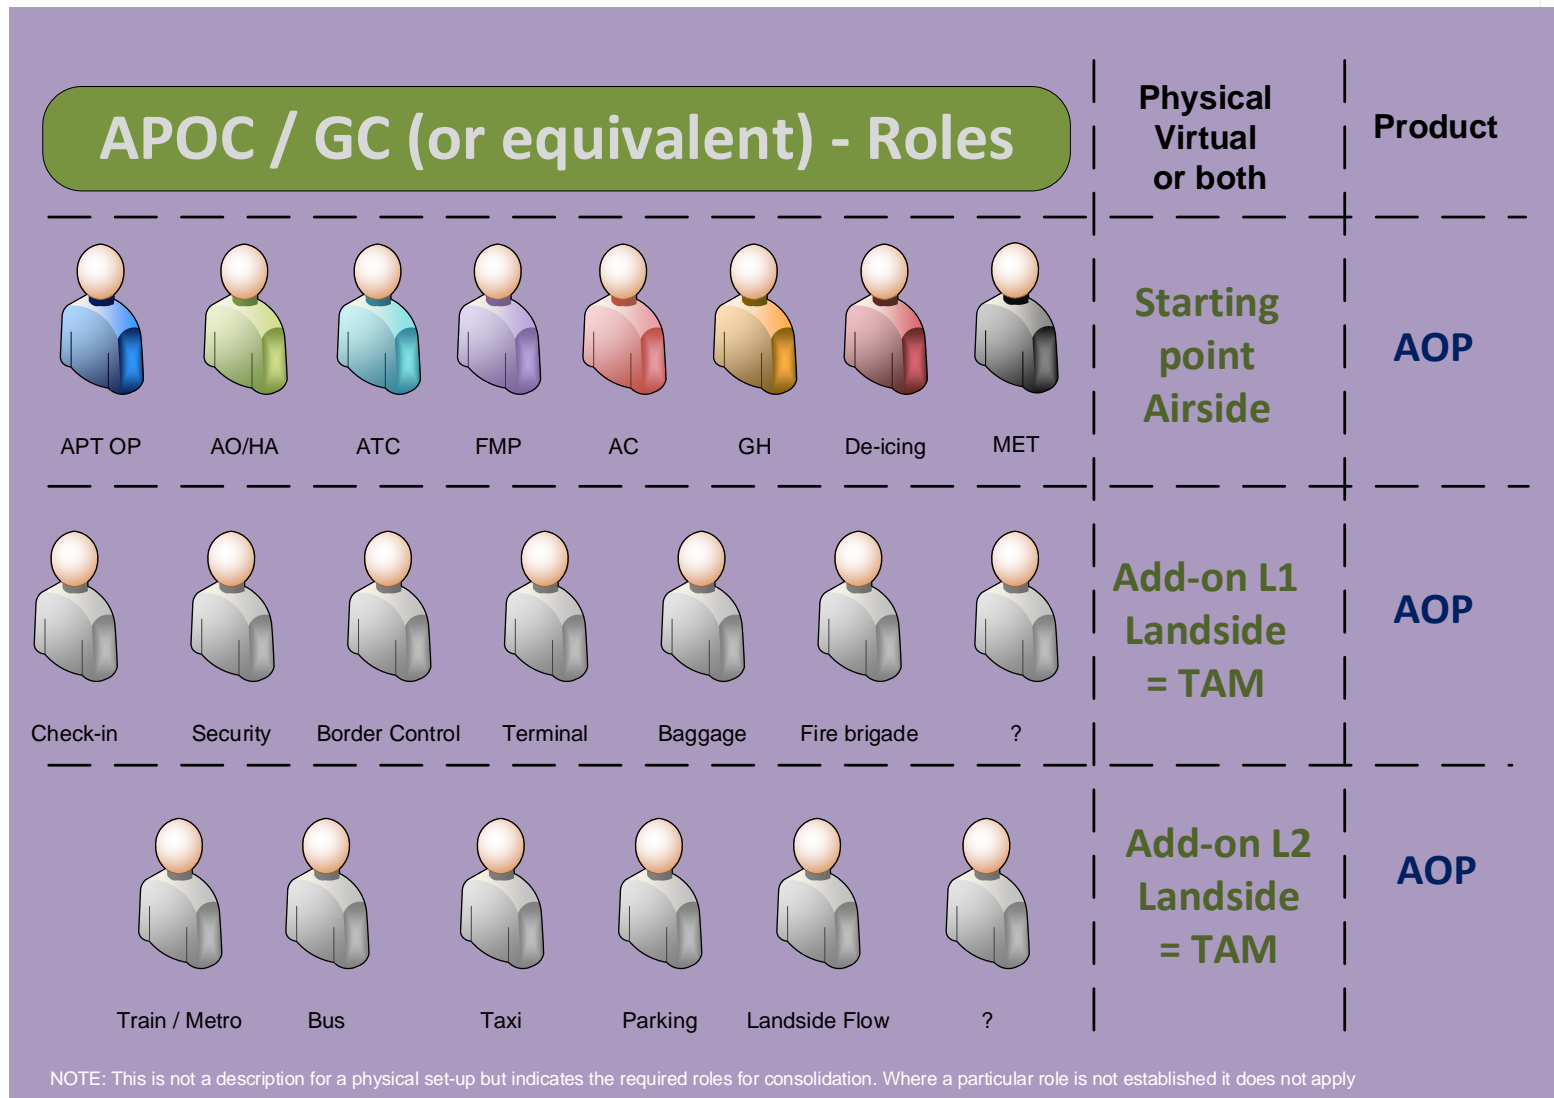

- Airport Operations Center (APOC)
 - Building and maintaining the
- Airport Operations Plan (AOP)
 - Connects to the
- Network Operations Plan (NOP)

Definitions

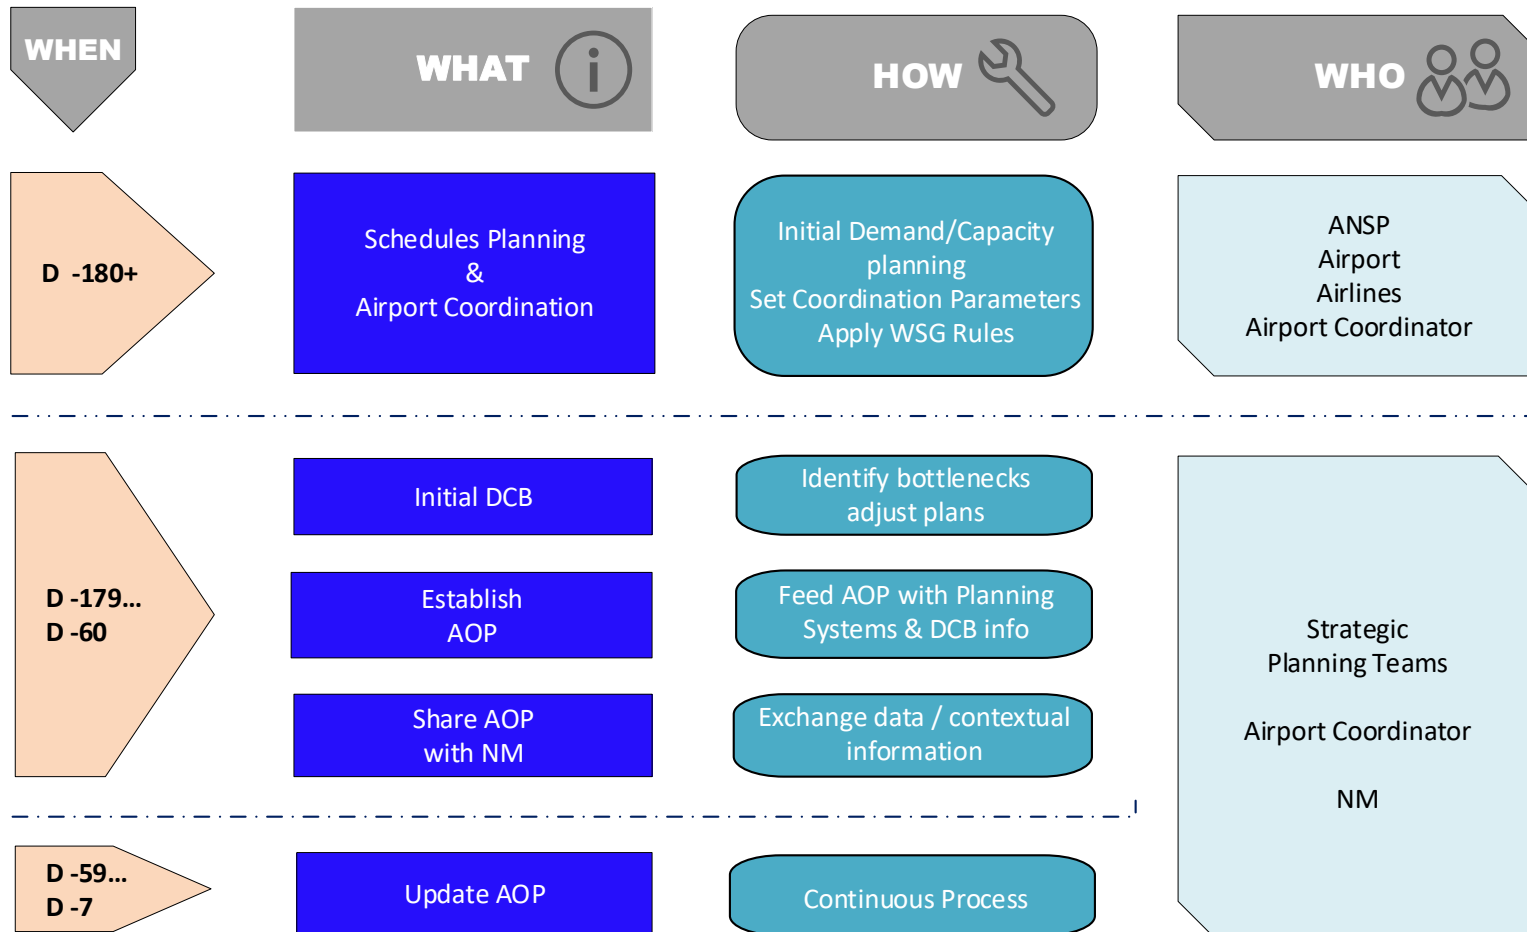

Airport Operations Center / Ground Coordinator

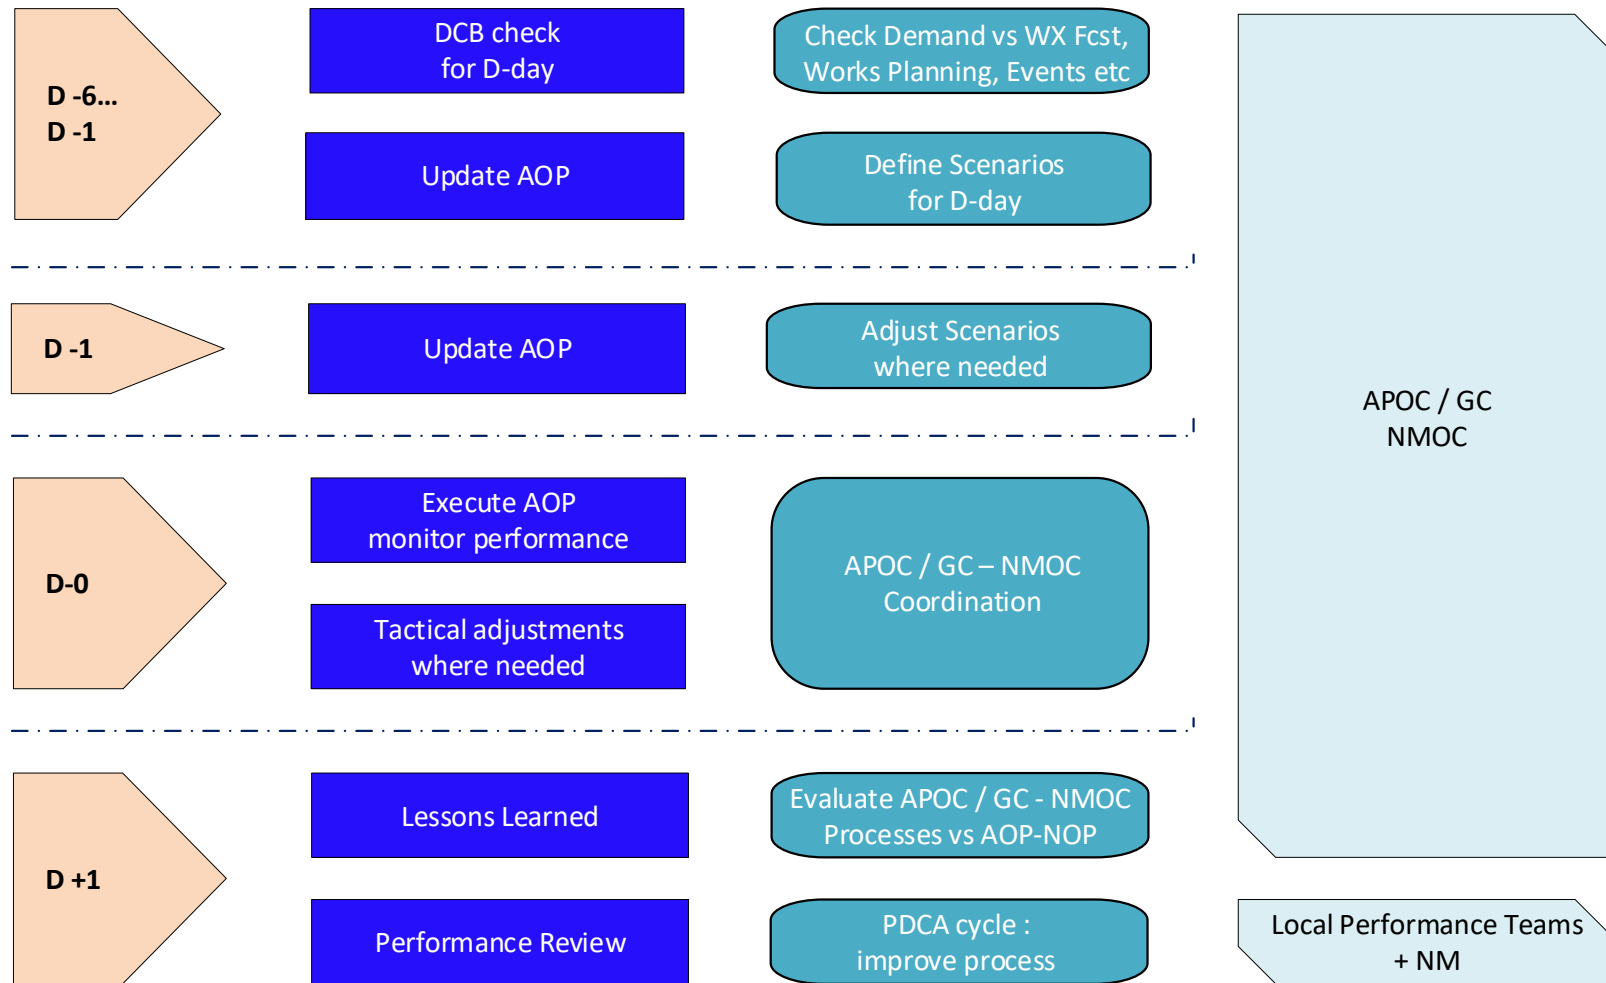

How is it done and who does it? (1/2)

AOP-APOC process

How is it done and who does it? (2/2)

Arrival Management and Target Times

- Inclusion of the arrival aspect in ATFM versus departure focus only
- Expand existing concept with the arrival component
- Target Times are a vehicle but nothing new
- A-CDM provides for target Times on departure
- Target Time Over (TTO) and Target Time for Arrival (TTA) will complement the trajectory
- Draft concept in preparation for consultation
- Airport Slots to be considered in future ATFM

Thank You
