REGULATION FOR UNIVERSAL
ACCESS TO ENERGY

5 MARCH - 16 JULY 2018

REGULATION FOR UNIVERSAL ACCESS TO ENERGY

*As part of its global initiatives, the Florence School of Regulation (FSR) is launching the **first online course focusing on energy sector issues pertinent to developing countries.***

This course will enable the learner in gaining a comprehensive vision to design the appropriate policy and regulatory framework needed to ensure sustainable energy for all.

Experts from across the world will provide participants with the necessary skills to address the issues of energy access.

Course Goals

The course analyses the multi-dimensional approach to energy access, by emphasising the role of regulation. This entails understanding of:

- The interdependence of the tools available to address energy access including the technologies (traditional, clean & smart), finance, business models and regulatory instruments
- The wider impact energy access has on health, education and on overall socio-economic development

Course Director

Ignacio Pérez-Arriaga is the Training Director at the FSR, Professor at the Massachusetts Institute of Technology (MIT) and Professor and Director of the BP Chair of Energy and Sustainability at Universidad Pontificia Comillas (UPC).

Course Structure

BLOCK 1

Context, challenges and approaches to energy access

BLOCK 2

Power sector in developing countries

BLOCK 3

Regulation of the power sector for energy access

BLOCK 4

Finance and business models for electrification

BLOCK 5

Factors and technologies for clean cooking

BLOCK 6

Strategic issues of energy access

Learning experience

- Interact with leading experts in the field
- Learn from cases from Asia, Africa and Latin America
- Join live panels and forum discussions
- Engage in group project and individual activities
- Work on an innovative online platform, supported by a dedicated team

Course Information

Launch: 5 March – 16 July 2018

Training Level: Fundamentals

Duration: 4 months

Target Audience: The training is developed for experienced managers and targets professionals from the energy sector including government agencies, regulatory bodies, energy companies, energy utilities, development organisations, but also academics and researchers.
